Multiple hydraulic pump drive transmission provides independent power for all machine functions.

Two 12 volt maintenance-free batteries, 1 300 CCA at -18°C (0° F), 24 volt system and 75 amp alternator.

One diesel fuel tank, 1 040 l (275 gal.), mounted on rear of upperworks, with level indicator in operator's cab.

- Optional: Cold-weather package with heater for fluids, brake pedals, batteries and computer display.

### Controls

Modulating electronic-over-hydraulic controls provide infinite speed response directly proportional to control lever movement. Controls include Manitowoc's exclusive EPIC® (Electronically Processed Independent Control) system with CAN-BUS technology providing microprocessor driven control logic, pump control, on-board diagnostics, and service information.

Block-up limit control is standard for hoist and whip lines.

Integrated wireless Load Moment Indicator system (LMI) offers standard load link for main boom and upper boom point. "Function cut-out" or "warning only" operation is selected via the Operator Interface Display on the LMI console.

Travel and swing alarms are standard.

- Optional: Anemometer (wind speed indicator). Booms and jibs are prewired for anemometer.

### Hydraulic System

Multiple high-pressure piston pumps, driven by a multi-pump transmission, provide independent closed-loop hydraulic power for the hoisting drums, boom hoist, swing, left crawler and right crawler.

Hydraulic reservoir has a capacity of 1 188l (314 gal.) and is equipped with a breather, clean out access, and internal diffuser.

Each function is equipped with relief valves to protect the hydraulic circuit from overload or shock.
